

S-BIN

BULK FRESH FISH CONTAINER

S-Bin

The S-BIN is a highly flexible Bulk Fresh fish container. Capable of carrying up to 500 kilos of fresh fish and slush ice. It completely breaks down for easy storage and transportation after it has been emptied. The side walls collapse and can be stored within an assembled bin. The S-Bin weighs only 22 kilos empty, making it easy to handle within a factory environment and light to transport where weight is an issue.

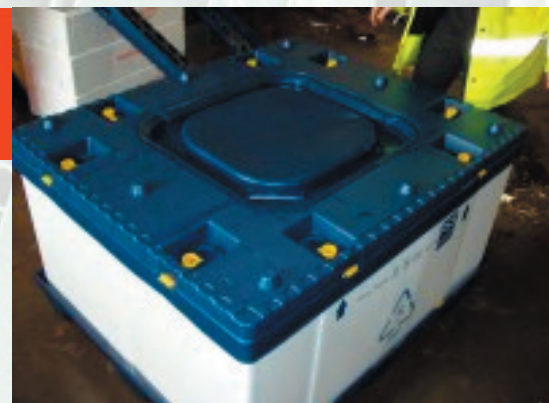

S-Bin Assembly & Use

The S-BIN is loaded through a hatch 60cm x 60cm in the top section and depending on the application a plastic liner as illustrated can also be used. Also available with internal separators and split floor levels. Adaptable for the transportation of live fish.

S-Bin Breakdown & Stacking

The S-BIN stacking features makes it both stable for transportation and storage. The footplate measures 1200cm x 1000cm and the walls are 640cm high. The wall height can be adjusted depending on the application.
